EDUCATION

G.H.Raisoni College of Engineering 2020 - 2024
B.Tech in Computer Science and Engineering *Nagpur, Maharashtra*
Overall GPA: 8.64

WORK EXPERIENCE

The Alter Office September 2024 - January 2026
Associate Frontend Developer *Bengaluru, Karnataka (Onsite)*

· Built the foundational architecture of a **production-ready AdTech platform** using **Next.js** with a **Turborepo monorepo**, implementing **Storybook** for scalable UI component development, setting up **GitHub Actions (CI/CD)**, and gaining exposure to **AWS deployment workflows**.

· Optimized a **live task-based recruiting platform (igotskills.in)** using **TanStack React Query** to reduce redundant API calls, improved **data-fetching performance**, added **TypeScript** support and refactored the project structure; also developed a **highly animated, fully responsive About page** for the company's website using **GSAP**, ensuring smooth transitions and responsive layouts across devices.

Remostart January 2024 - June 2024
Frontend Developer Intern *Remote*

· Contributed to **feature-level development** and **UI enhancements** across multiple **production-grade web platforms** in **AI, supply chain, and HR tech domains**, gaining **hands-on experience across diverse product environments** while building **scalable interfaces** using **React.js, Next.js, TypeScript, and Tailwind CSS**.

· Improved **frontend performance** by approximately **35–40%** on the **employee engagement survey platform** through optimized **component rendering** and **API integration**, resulting in significantly better **Lighthouse performance scores** and **Core Web Vitals (LCP, FCP, CLS)**.

TECHNICAL SKILLS

Languages	HTML, CSS, Javascript, Typescript
Frameworks and Libraries	React.js, Next.js, Astro.js, React Native, Express.js, Redux, Zustand, TailwindCSS, Styled-Components, GSAP, Framer motion, Tanstack Query
Cloud Services	AWS, Supabase, Firebase, Vercel, Netlify, Render
Databases	MongoDB, PostgreSQL
Testing	Vitest, Playwright

PROJECTS

Frontdesk April 2025
Hosted Link ⬀ *GitHub* ⬀

· Built a **hotel management dashboard application** for staff to **track bookings, check-ins/check-outs, room availability, sales metrics, and occupancy rates**, focusing on operational clarity and usability.

· Developed the frontend using **React.js** and integrated a **Supabase backend** for authentication, database, and real-time data access, leveraging **React Query** for efficient server-state management, caching, and seamless data synchronization across the dashboard.

PharmEase August 2024
Hosted Link ⬀ *GitHub* ⬀

· Built a **production-ready pharmacy inventory management web application** using **React.js**, **React Router**, and **TanStack React Query**, enabling **medicine stock tracking**, **expiry date monitoring**, and **low-stock visibility** with a focus on **performant UI** and efficient **server-state management**.

· Implemented **inventory workflows** including **medicine creation, updates, and expiry-based filtering**, along with **complex forms**, and **data visualizations** using **React Hook Form**, and **Chart.js**; integrated the frontend with **REST APIs (Express.js)** and **deployed the backend using Netlify Serverless Functions**.
